

How to Run Roblox

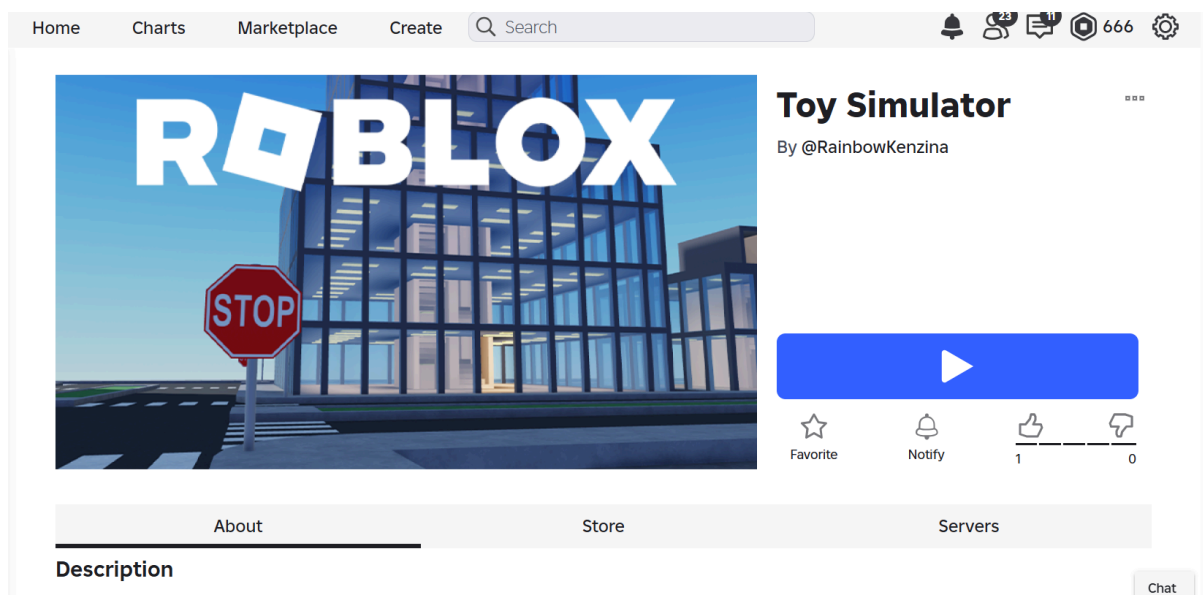

Go to the webpage version of Roblox.com and follow the website's directions to sign up for an account. Once you've logged in, it should look like this:

Note: My UI may appear slightly different due to a Chrome extension, but the overall mechanics you need are unaffected.

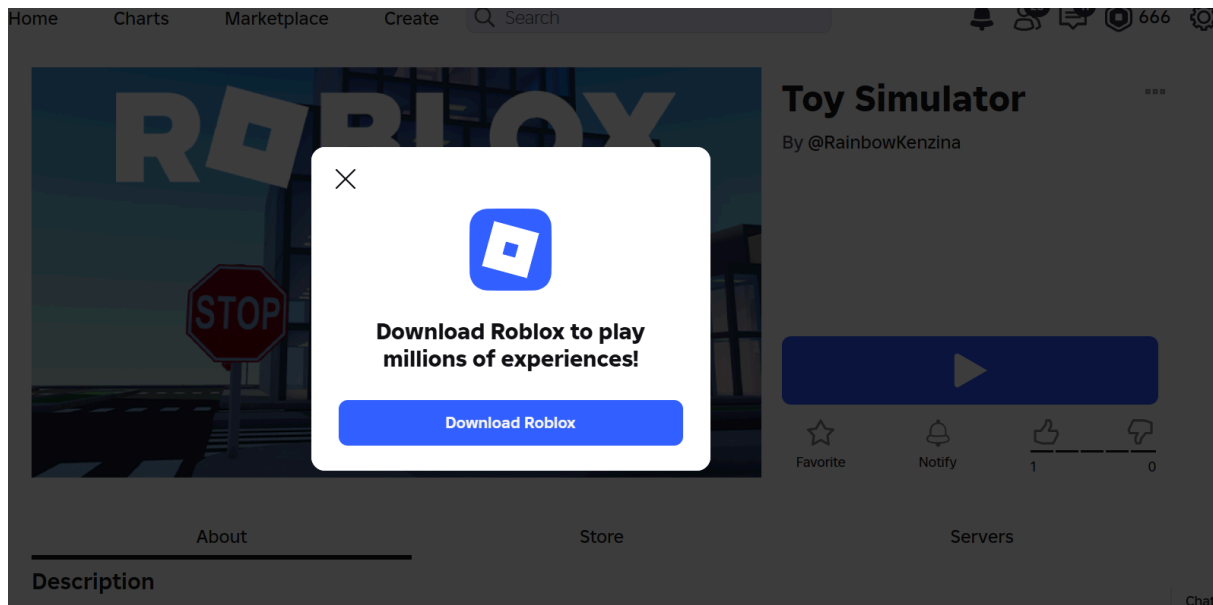

Now, click on this link: <https://www.roblox.com/games/88222382752093/Toy-Simulator>.

Your UI should look like this:

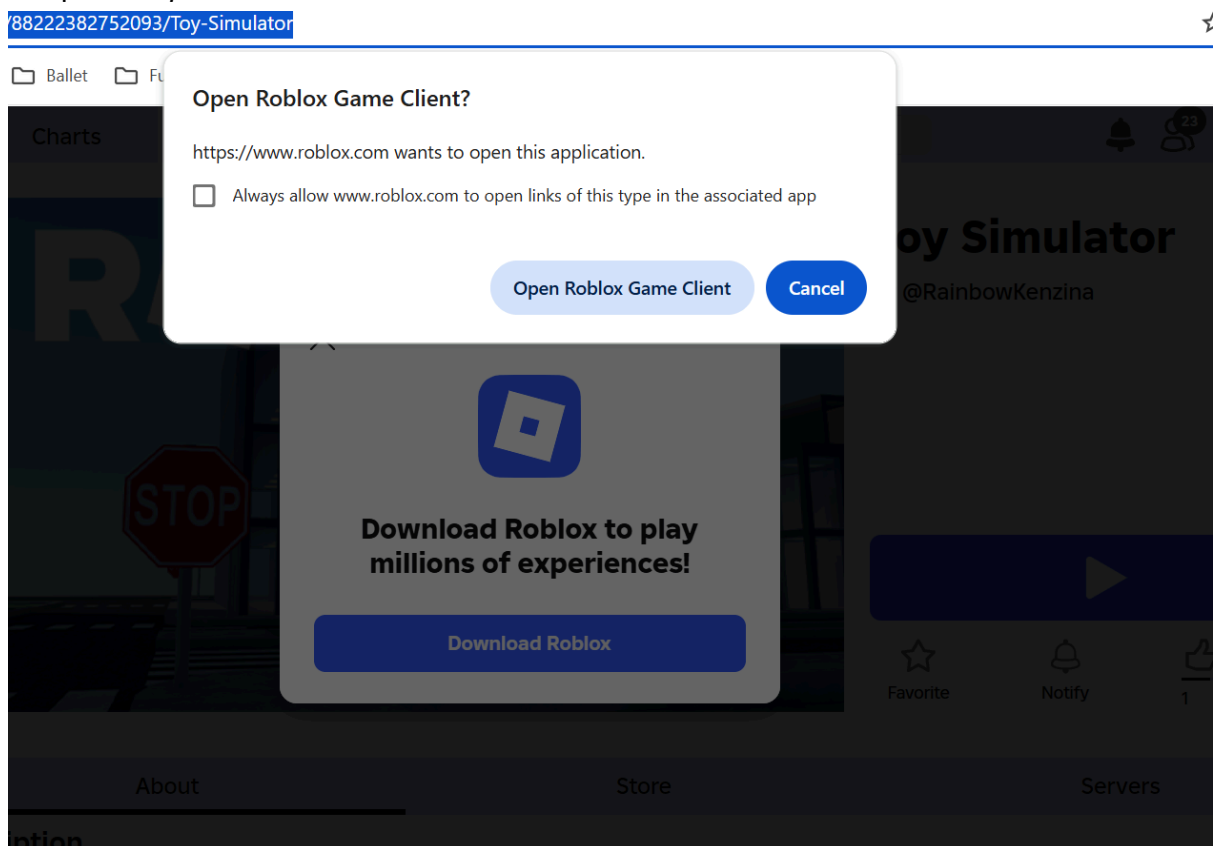

Click on the blue play button on the right. Then, this should pop up:

Click on '*Download Roblox*', and follow Roblox's directions to download the app. Once you've downloaded it successfully, the game should run. If not, go back to <https://www.roblox.com/games/88222382752093/Toy-Simulator>.

Repeat the previous steps by pressing the blue play button. '*Download Roblox*' will pop up again, but DO NOT click on it since you've already downloaded it. Wait for this to pop up, and press '*Open Roblox Game Client*'.

Now, you should be teleported into the game. Have fun!

Game Controls of Roblox

W - Move Forwards

A - Move Leftwards

D - Move Rightwards

S - Move Backwards

Left Click - Interact

Right Click - Camera toggle

Space bar - Jump

Toy Simulator

When you enter a toy stimulator, you will see this page. You can click into settings to turn the shadow on or off. You can click credits to see the creators of this game. After clicking play, remember to see the green box at the top of the screen for instructions. You can also see the name of the object in the green box after you have found one item.

If the instructions are unclear, your objective is to find three weird objects on the map. You can interact with NPCs around the map to give you hints.

Note 1: You could play with the car, but it wouldn't help with collecting the objects, it's just for playing purposes

Note 2: To interact with people, simply click on the question mark above their heads.

*Note 3: To collect objects, go near them and touch them. Clicking does **not** help.*

Note 4: When you find the glowing green block to claim your rewards, stand on it and don't move. The teleportation takes some time.

DO NOT PROCEED IF YOU HAVEN'T COMPLETED THE OBJECTIVE AND CLAIMED YOUR REWARDS YET. THERE ARE SPOILERS AHEAD.

Rewards Server

This is the second part of the game. You ***are locked in first person***. The game controls are still the same, except for a few additional parts:

Shift - Sprint

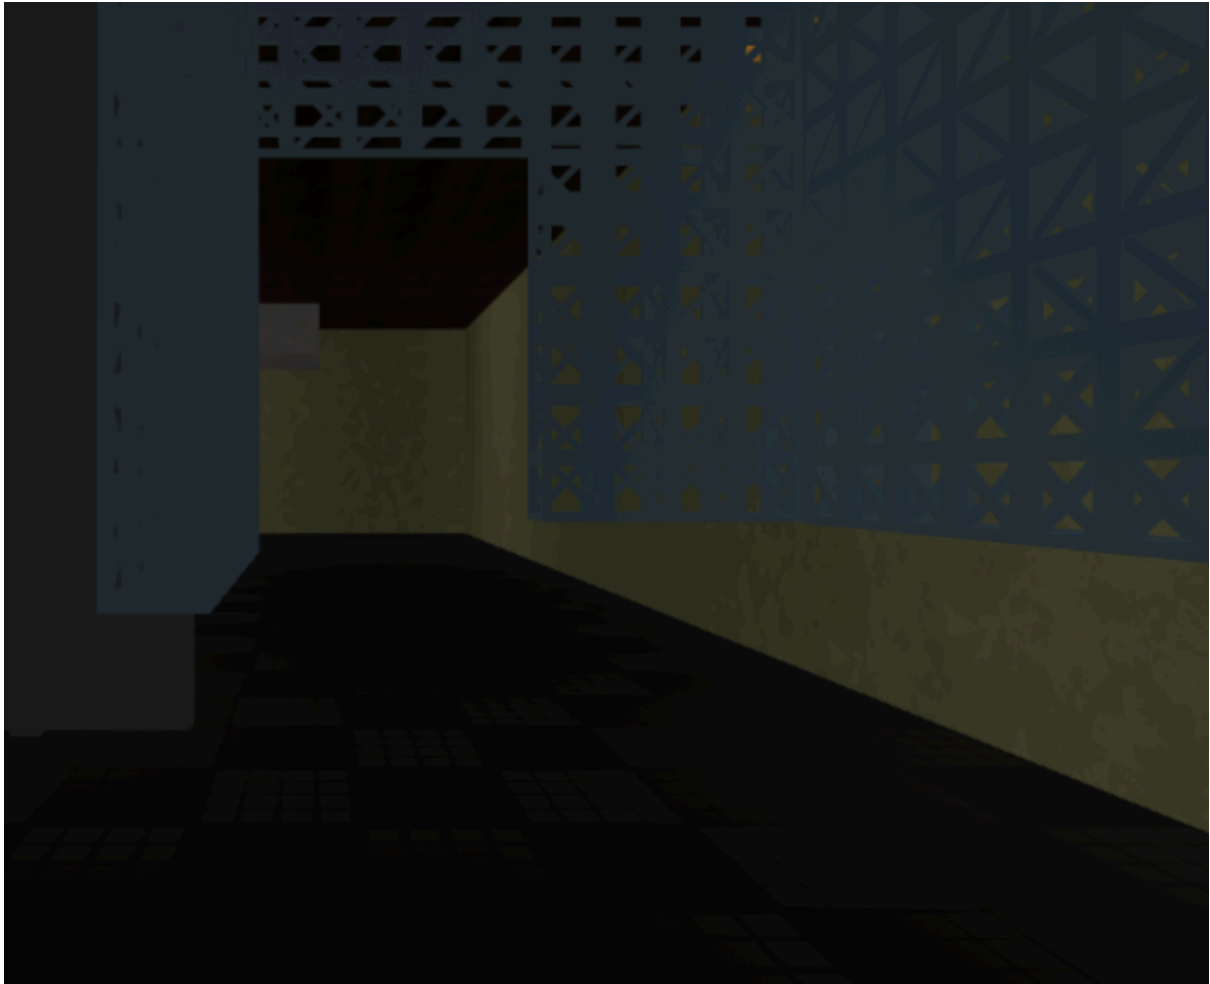

Note: You have a stamina bar that goes down as you sprint; it recovers when you're walking at normal speed.

C - Crouch

Your objective is to escape the creepy house via the front door. The front door is locked, so you'll have to first find the key.

Hint: the key is in the basement.

To climb back from the basement to the first floor, press space to jump and press W to go forward to climb up this ladder:

Hopefully, you now know how to play the game. Enjoy!
